

How to use wisdom ESP 32 ?

1-connect the USB between the wisdom EPS32 and the pc .

2- go to **arduino**

3-then we go to **preference** window .

4-enter [<https://d1.espressif.com/d1/package-esp32-index.json>]

5-go to **tool** -> board->Board manager ->search for ESP 32 -> install .

6-also go to **tool** ->board ->ESP32 wrover module .

7-now you can use it and if you want to test it you have to go to **running** ->example .
